

# DRELLOSCOP 1298

Drelloscopie®

- State-of-the-art, modern LED-Technology
- High illuminating strength and homogenous illumination of the entire web width
- Robust, interference-free industrial version for continuous use
- Easy operation via control device with multifunctional rotary button

# DRELLOSCOP 1298

## Connection

Control of the flash sequence takes place either with manual settings or externally.

Various synchronisation possibilities provide optimum functionality and safe error detection.

The "external" operating mode makes additional image shift or slow motion functions available for optimum smooth visual observation.

## Stroboscope

High-power wide-angle illumination for web widths of 300 to 2000 mm.

Especially suited for use under daylight conditions.

Short flash duration for excellent image representation.

Daylight-similar light spectrum for colour fidelity.

Uniform homogenous illumination.

## Remote control

All operating and display elements of the control device are protected against dust and humidity by a abrasion-resistant membrane keyboard.

Magnetic holders are attached to the bottom of the control device for fixing to the machine frame.
